

[Module 1: Course Introduction](#)

- Introductions and course logistics
- Course objectives

[Module 2: Software-Defined Data Center](#)

- Describe the evolution of the software-defined data center
- Cloud computing overview
- Characteristics of cloud services
- Categories of cloud computing
- Describe the VMware product stack for the software-defined data center

[Module 3: vCloud Director Concepts](#)

- Explain vCloud Director concepts
- Configure and manage provider VDCs
- Identify storage, compute, and network resources for vCloud Director
- Create and manage organizations
- vCloud Director organization VDCs

[Module 4: Organization VDCs](#)

- Organization VDC allocation models
- Recognize resource allocations for an organization
- Describe the network types available in vCloud Director (external, organization, and vApp)
- Discuss the organization and vApp network traffic choices
- Examine the function of network pools

[Module 5: Virtual Machines and vApps](#)

- Discuss the use of virtual machines
- Design and manage vApps

[Module 6: Catalogs](#)

- Create and manage catalogs
- Manage vApp templates

[Module 7: Users and Role-Based Access](#)

- Describe role-based access
- Create custom security roles
- Describe and configure LDAP integration with Active Directory
- Describe single sign-on
- Enable a SAML identity provider

- Describe two-factor authentication

[Module 8: Advanced Networking](#)

- Describe the use and placement of NSX edge services gateways in relation to vCloud Director
- Review routing with the distributed logical router and edge services gateways in combination with vCloud Director
- Firewall management in vCloud Director with edge services gateways and the distributed firewall

[Module 9: Resource Management and Monitoring](#)

- Manage provider and organization VDCs
- Manage VMware vCenter Server® instances and VMware ESXi™ hosts
- Manage vSphere datastores
- Configure and manage resource pools at the vSphere level
- Monitor usage information at provider and organization VDCs
- Analyze vCloud Director logs
- Monitor vCloud Director environments with VMware vRealize® Operations Manager™ and VMware vRealize® Log Insight™
- Use VMware vRealize® Business™ for cost management

[Module 10: Customer Onboarding and Hybrid Cloud](#)

- Tenant layer 2 VPN access
- Tenant SSL VPN access
- Review options for external connectivity with VPN
- Import existing infrastructure managed by vCenter Server into vCloud Director
- Use vCloud Director Extender for hybrid cloud setup and onboarding

[Module 11: vCloud Availability for vCloud Director](#)

- Architecture for vCloud Availability for vCloud Director
- Prerequisites of vCloud Availability for vCloud Director
- Implementation of vCloud Availability for vCloud Director

[Module 12: vCloud Director Installation](#)

- vCloud Director network, hardware, and software requirements
- vCloud Director setup overview
- vCloud Director cell design
- Install and configure the vCloud Director database (Microsoft SQL Server, Oracle database, or PostgreSQL)
- Create SSL certificates
- Configure VMware NSX® Manager™ for a new vCloud Director installation
- Install and configure an AMQP broker

- Download and install the VMware public key
- Use and set up vCloud Director federation

[Module 13: vCloud Director API and Metadata](#)

- Describe tools to access the API of vCloud Director API
- Use of REST API in VMware vRealize® Orchestrator™
- Describe access to vCloud Director using VMware PowerCLI™
- Create and update metadata on objects
