Service Oriented Architecture: Service Engineering and Modeling

Building Service-Oriented Solutions Using Service Engineering

- Describe new challenges faced when using a service-oriented engineering approach
- Describe service life cycle concepts and processes for managing service-oriented projects
- Describe the phases of service engineering (analysis, delivery, and management)

Understanding Service Modeling Process

- Describe service modeling
- Describe the service categorization
- Outline the service modeling process
- Explain how to decompose a business process
- Describe service-oriented modeling guideline
- Explain how to use service profile to document details about a service
