

Introduction

Learning Objective:

In this introductory module get a high-level introduction to the TOGAF approach. Understand the definitions of terms used in it.

Topics

- Key Concepts of Enterprise Architecture
- TOGAF Approach
- Definitions

Architecture Development Method

Learning Objective:

Understand the elements of the TOGAF framework. Explore the TOGAF Architecture Development Method (ADM) – a step-by-step approach to developing Enterprise Architecture.

Topics

- TOGAF Framework Core
- ADM
- Approach to Developing an Enterprise Architecture

ADM Guidelines & Techniques

Learning Objective:

This module covers the guidelines and techniques available for use in applying the TOGAF standard and the TOGAF ADM. You can find additional guidelines and techniques are also in the TOGAF Library.

Topics

- ADM Guidelines
- ADM Techniques

Architecture Content Framework

Learning Objective:

This module explores the TOGAF content framework, that includes a structured metamodel for architectural artifacts. It will also dwell into the use of re-usable architecture building blocks.

Topics

- Content Framework
- Structured Metamodel for Architectural Artifacts
- Reusable Architectural building blocks
- Typical Architectural Deliverables

Enterprise Continuum & Tools

Learning Objective:

This module deals with the appropriate taxonomies and tools to categorize and store the outputs of architecture activity within an enterprise.

Topics

- Categorization
- Storing output

Architecture Capability Framework

Learning Objective:

This module will cover the organization, processes, skills, roles, and responsibilities required to establish and operate an architecture practice within an enterprise.

Topics

- Organizational Requirements
- Processes
- Skills
- Roles and Responsibilities
