SAN Management

1. SAN Management

- Host SAN Concepts
- SAN Storage
- SAN Connectivity

2. MDS-Series Switch Tools

- MDS Management Tools
- Licensing
- Management Tools Installation and Usage
- Switch Configuration
- Maintenance Tasks
- Management Security

3. B-Series Switch Tools

- B-Series Management Tools
- Licensing
- Management Tools Installation
- Switch Configuration
- Maintenance Tasks
- Management Security

4. SAN Management and Fabrication Virtualization

- Fabric Login Process
- Determine Device WWNs
- Zoning Overview
- Virtual Fabrics
- B-Series Switch Zoning
- MDS-Series Virtual SANS
- MDS-Series Switch Zoning
- VNX Storage Provisioning

- Symmetrix Storage Provisioning

5. Fabric Configuration

- Fibre Channel Fabric
- B-Series Fabric Merge
- MDS-Series Fabric Merge
- Ineroperability Overview
- FCIP Configuration
- iSCSI Fabric Configuration

6. Port Virtualization

- N_Port ID Virtualization
- B-Series NPIV and Access Gateway Configuration
- MDS-Series NPIV and NPV Configuration
- vSphere NPIV Configuration

7. SAN Transformation

- Cloud Concepts Overview
- Converged Network Overview
- FCoE Overview

8. Troubleshooting and Monitoring

- Troubleshooting SAN
- B-Series Troubleshooting and monitoring
- MDS-Series Troubleshooting and monitoring
