Networker Integration Workshop

1. NetWorker Performance Management

- NetWorker Process Communication
- Sizing NetWorker for Best Performance
- NetWorker Performance Best Practices
- Backup and Recovery Best Practices

2. NetWorker Integration with Avamar

- Capabilities and Use Cases
- Configuring the Integration

3. NetWorker Integration with Data Domain

- NetWorker to DD Integration and Use Cases
- Configuring NetWorker Integration with Data Domain

4. NetWorker Integration with Microsoft SQL

- Microsoft SQL VSS-based backup with NMM
- Microsoft SQL VSS-based recovery with NMM
- Microsoft SQL VDI-based backup with NMM
- Microsoft SQL VDI-based recovery with NMM

5. NetWorker Integration with Microsoft Exchange

- Exchange Backup with NMM
- Exchange Mailbox Database Recovery
- Exchange Granular Level Recovery
- Exchange DAG backup and recovery with NMM

6. NetWorker Integration with Microsoft SharePoint

- NMM and SharePoint Backup
- Microsoft SharePoint Backup and Recovery with NMM

7. NetWorker Integration with Microsoft Hyper-V

- NMM Configuration or Hyper-V Backup
- NMM Configuration for Hyper-V Recovery

8. NetWorker Integration with Oracle

- Oracle and NMDA Overview
- Oracle Database Backup with NMDA
- Oracle Database Recovery with NMDA

9. NetWorker Integration with VMware

- VMware Data Protection Fundamentals
- EMC Backup and Recovery Appliance Overview
- EBR Installation and Configuration
- VMware Backup and Recovery with NetWorker and EBR

10. NetWorker Snapshot Management

- NetWorker Snapshot Management Overview
- NSM Requirements and Configuration Checker
- NSM File System Backup and Recovery
- NSM Application Backup and Recovery

11. NetWorker Integration with SAP

- SAP and NMSAP Overview
- SAP Backup with NMSAP
- SAP Recovery with NMSAP
- SAP HANA Backup and Recovery with NMSAP
