LDAP and Directory Services: Essentials

Identity Management Overview

- Introduction to Identity Management
- Functional aspects of Identity Management
- Overview of Oracle Identity Management Products

Basic LDAP Concepts

- Introduction to directory server, directory service and LDAP
- LDAP schema and structure
- Implementing LDAP
- LDIF (LDAP data interchange format)

Directory Services: Introduction to OUD and OID

- Features and architecture of OUD
- Basic administration tasks of OUD
- Features and architecture of OID
- Comparison of OUD and OID
- Basic administration tasks of OID

Managing Directory Services: Command line tools

- Searching directory entries
- Managing directory entries (Creating, modifying, and deleting)
- Managing entries in OID by using Bulk tools
- Managing directory schema (Creating, modifying, and deleting object classes and attributes)
- Exporting and Importing directory data

Managing Directory Services: OUDSM

- Connecting to OUD from OUDSM
- Searching directory entries
- Managing directory entries
- Managing directory schema

Managing Directory Services: ODSM

- Connecting to OID from ODSM
- Searching directory entries
- Managing directory entries

- Managing directory schema

Basic Logging

- Introduction to logging
- Viewing log files in OUD and OID
- Configuring log files in OUD and OID

Integrating Applications with LDAP Directory Services

- Exploring OUD and OUD with JXplorer
- Integrating Oracle WebLogic Server with OUD data source
