Oracle Essbase Studio 11.1.2: Create Manage Data Structures (11.1.2.2)

Essbase Studio Overview

- Benefits of Essbase Studio
- Essbase Studio Architecture
- Essbase Studio Workflow

Creating Data Source Connections

- Creating Connections with Connection Wizard
- Defining Connections to Text file Data Sources
- Defining Connections to Relational Data Sources

Creating Metadata Elements

- Creating metadata elements
- Managing metadata elements

Building Hierarchies

- Creating Standard Hierarchies
- Creating Measure Hierarchies
- Building Parent-Child hierarchies

Creating Cube Schemas

- Building cube schemas with Cube Schema Wizard
- Choosing measures and hierarchies for cube schemas

Creating Essbase Models

- Creating Essbase models from cube schemas
- Setting Essbase model properties
- Setting dimension and member properties
- Validating your Essbase models

Deploying Essbase Cubes

- Deploying cubes using Cube Deployment Wizard

- Setting load options for deploying cubes

Enhancing Your Data Source Connections

- Managing data source connections
- Creating minischemas

Enhancing Your Metadata Elements

- Creating date elements
- Creating derived text measures
- Creating editing, and managing alias sets

Enhancing Hierarchies

- Building alternate hierarchies
- Adding attribute dimensions to your hierarchies
- Building calendar hierarchies
- Creating varying attribute hierarchies

Enhancing Cube Schemas

- Defining data load mappings
- Creating Essbase models from Cube Schema Wizard

Enhancing Essbase Models

- Enhancing model, dimension, and member properties

Enhancing Cube Deployments

- Deferring deployments
- Troubleshooting
- Setting up incremental loads
- Viewing deployment history

Viewing Lineage

- Navigating the Lineage Viewer
- Viewing the history of an element
- Editing data element properties
- Editing Essbase model properties
- Showing deployment history
- Viewing sample data

Working with Drill-through Reports

- Drill-through reporting overview
- Creating drill-through reports
- Customizing reports
- Associating drill-through reports with Essbase models
- Performing drill-through reporting in Smart View

Managing the Essbase Studio Repository

- Exporting the Essbase Studio catalog
- Copying, moving, and backing up the Essbase Studio catalog

Integrating Essbase Studio with Oracle Business Intelligence

- Connecting to OBIEE
- Creating OBIEE dimensions and cube schemas
- Generating key and caption bindings for OBIEE
