Lesson 1: Solving Business Problems Using AI and ML

Lesson 2: Collecting and Refining the Dataset

Lesson 3: Setting Up and Training a Model

Lesson 4: Finalizing a Model

Lesson 5: Building Linear Regression Models

Lesson 6: Building Classification Models

Lesson 7: Building Clustering Models

Lesson 8: Building Advanced Models

Lesson 9: Building Support-Vector Machines

Lesson 10: Building Artificial Neural Networks

Lesson 11: Promoting Data Privacy and Ethical Practices
